## Airborne Field Trips

Airborne Gymnastics & Cheerleading Academy is now offering field trips! A field trip to Airborne consists of explaining to the children the importance of daily exercise and good eating habits, while showing them it is fun to participate in physical activity. Each child will participate in a safe & fun obstacle course designed for beginners. We offer instruction for both boys and girls ages 2 through adult, and look forward to accommodating your needs. The cost of the trip is \$9 per child.

Airborne strives to incorporate physical fitness at an early age. We believe that sports promote a healthy lifestyle by encouraging daily exercise and healthy eating habits. Here our goal is to develop well-rounded children by building confidence, character, leadership, determination and discipline through participation in a safe and fun atmosphere. Airborne also promotes physical fitness, coordination, endurance, body development, strength and flexibility. Individual emphasis is placed on working towards each child's full potential at all levels through hard work and dedication. We believe that children will go as far as his or her abilities will lead them.

If you would like to schedule a field trip at Airborne, or would like more information please don't hesitate to contact me.

Thank you,

Tori Hoffman
